The Yorkshire Deanery

Department for NHS Postgraduate Medical and Dental Education

INFORMATICS

PROGRAMME

We will work in groups and also on the computer cluster. Topics will include:

- Decision support
- PowerPoint
- Writing hypertext
- An introduction to intranets and web-site design
- The consultation
- The tutorial/presentation
- Information management

Additionally there will be two Masterclasses in the evenings at the hotel.

Tuesday

1.30pm	Introduction: - the scope of health informatics – introducing the HIT – *Paul*
2.30-5.30pm	Group & Cluster Work

Evening Masterclass at the hotel – *Alan*

Wednesday

8.30-11.30am	Group & Cluster Work
11.30-12.30	Plenary – sharing ideas
1.30-4.30pm	Group & Cluster Work
4.30-5.30pm	Plenary – sharing resources

Evening Masterclass at the hotel – *Paul*

Thursday

8.30-10.30am	Working on homework
	Practising tutorials/presentations – pairs/trios
	Using the HIT
	Trainer's requests
10.30-12.00	Informatics in the curriculum
	Group presentations
	Evaluation and close

Timetable and course content flexible as before, plenary sessions very flexible depending on learner's needs.

Lunch will be available if requested in the college bistro from 12:00 on Tuesday and Thursday

INFORMATICS SEMINAR

DARLINGTON COLLEGE

8 – 10 November 2005

Important Points from the Questionnaire to Trainers on Needs in IT Use in Training

We sent a questionnaire to trainers in 2003.

Specific requests for training were actually quite few – most just saying "I needs more training". Those that mentioned specific areas asked for:

1) Using net based resources to find information

2) Sharing good web-sites

3) Using decision support software in the consultation

4) Use of PowerPoint in teaching

5) Sharing good CD based resources

6) Access

(items only included if mentioned more than once)

In the light of this, priority areas seem to be:

1) Use of IT in the consultation and decision support software
2) Use of IT in teaching situations – the tutorial
                           the presentation
3) Information Management – finding information
                           handling information
4) Developing and Sharing resources

Suggestions for homework:

1) Think about a tutorial or series of tutorials that you would like to work on for your GP registrar that is about, or makes significant use, of IT

2) Think about a presentation you would like to be able to give, including relevant web-links

3) Bring a significant clinical question (or two) you would like to research the answer to

4) Bring along any resources, ideas, materials for sharing with the group (good and bad)

5) Please bring a blank CDROM (CD-R) to save your work on

6) Have a look around the course materials at:

   http://128.240.23.108/eprval/HIT/

7) Find Darlington college using http://www.multimap.com/ the post code is DL9 4QP
