

Emergency treatment checklist

from The MDU - Risk assessment for revalidation - part one

Is there a protocol about how staff should deal with medical emergencies, including the process and indications for contacting emergency services in the absence of a doctor?

Yes
No

Are the practice staff trained in this protocol, and is their performance regularly monitored?

Yes
No

If the GPs use a mobile telephone for emergency calls (including out-of-hours), do you have an alternative system for contact?

Yes
No

Does the practice have up-to-date and appropriate emergency equipment and drugs that are in date for the types of emergency likely to arise?

Yes
No

Do the GPs carry adequate supplies of appropriate drugs and equipment for use in an emergency?

Yes
No

Is there a system to ensure that the resources held by the practice and by the GPs individually are regularly checked, maintained and updated (appropriate stock levels, drugs in date, equipment in working order, etc)?

Yes
No

Does the practice have a system to review the care of emergency cases, e.g. by significant event auditing?

Yes
No

Have all clinical staff received resuscitation training:

- To use the equipment (as appropriate)?
- In basic emergency care (ABC)?
- Is this repeated annually?
- Is the training logged?

Yes
No
